COMPANIES REPRESENTED

ASCO Power Technologies - Emerson
Transfer Switches
Mechanically Held Contactors
Paralleling Switchgear
Value Added Transfer Switches
ASCO Services, Inc.
www.ascopower.com

Automatic & Manual Transfer Switches – For Residential, Commercial and Industrial Applications. Open Transition, Delayed Transition, Closed Transition, Bypass Isolation, Soft Load, Service Entrance Rated, Special Transfer Applications. Medium Voltage Transfer Switches for 5 KV and 15 KV applications with Communication Capability.

Paralleling Switchgear:

Low Voltage SYNCHROPOWER® Systems, Medium Voltage SYNCHROPOWER® Systems, 346, 4000 & 7000 Series Digital Generator Paralleling Control Switchgear,

Value Added Transfer Switches:

Transfer Switch with Distribution System, Two and Three Source Automatic Transfer Systems, ATS Switchboards. Generator to Generator Control Systems.

Lighting Contactors, Remote Control Contactors and Gas Valve Relay Panels

Surge Suppressors (TVSS – SPD)

ASCO Connectivity Solutions:

PowerQuest Power Monitoring and Control Systems.

ATS Remote Annunciators.

ASCO Services, Inc.:

Modification and Upgrades to Existing Equipment, Emergency Service, Startup Service and Preventive Maintenance Programs

AVTRON LOADBANK, Inc.
Division of Emerson Network Power
AC Loadbanks, DC Loadbanks and Resistors
www.vertivco.com/en-us/products-catalog/critical-power/load-banks/

Load Banks and Power Resistors

Portable, Permanent Resistive and Reactive Load Banks
Radiator Load Banks, Trailer Mounted Load Banks,
50Hz Load Banks, DC Load Banks, Froment Load Banks and Power Resistors.

BENDER Inc.
Industrial Products Group
www.bender.org

Electrical Safety Products

Ground Fault Relays; Ground Fault Location Systems;
Portable Ground Fault Locators' On-Line and Off-Line
Insulation Monitors; Low Voltage Protective Relays; and
Residual Current Monitoring.

CONTROLLED POWER COMPANY
www.controlledpwr.com

Power Conditioning and Power Purification Systems Voltage Regulators, Isolation Transformers, Power Conditioners, Single Phase Ferroresonant UPS, DC Powered MRI Suite Lighting, Power Regulating Equipment for Medical Applications, Lighting Inverters and DC Power Systems

Surge Protection Devices – Parallel Devices for First-Line Defense for Protection of Electrical Equipment.
570 Series Hybrid Design-375KA per Mode-750KA per Phase. 560 Series Modular Design-160KA to 1000KA per Phase. 510 Series Modular or Non-Modular Design-250KA per Mode or 500KA per Phase. 420 Series-50KA per Mode or 100KA per Phase. 330 Series-80KA per Mode or 160KA per Phase. 320 Series-25KA per Mode or 50KA per Phase.

Fire Pump Electric Controllers - AC Controllers from 120 Volts to 7200 Volts - Full Voltage, Wye-Delta, Autotransformer Part Winding, VFD and Solid State Soft Start Applications.

Limited Service Electric Fire Pump Controllers
Diesel Engine Controllers for 12 & 24 Volt Start, Class 1, Div 2 Diesel Engine Controllers
Jockey Pumps
Separately Mounted ATS for Fire Pump Controllers

Isolated Power Systems and Accessories for Operating Rooms. Including Surgery, X-Ray, and Laser Applications. Power and Ground Modules, Patient Service Consoles, Line Isolation Monitors and Remote Indicators. Digital Clock/Elapsed Timers and Test Equipment.

Engineering Power Conversion Solutions: Rectifiers, Power Supply, Field Excitation Systems, Cranes, Magnets, Elevators, Transit and DC Substations.

Engineered Cable System Reliable, Cost-effective, Flexible and Maintenance Free Alternative for Bus Duct Applications Power Distribution Feeder Systems. Voltages from 600V - 69kV. Ampacity from 1000A - 8000A. Indoor and Outdoor Applications.

Conventional Dry Type Transformers, from 5 VA to 10,000 KVA and Voltage Classes Through 35 KV.
Encapsulated (Silica / Resin) Transformers to 500 KVA with or without 316 Stainless Steel Enclosure
Substation Transformers to 10,000 KVA – VPI
Hazardous Location Transformers - Class 1, Div 2 316 Stainless Steel - UL Listed to 150 KVA
K-Factor and Harmonic Mitigating Transformers
Drive Isolation Transformers
Cast Coil Transformers
Pad Mounted Transformers UL Listed to 5000 KVA
Motor Starting Auto Transformers
Current Limiting Reactors and AC Reactors
Load Interrupter Switches & Switchgear

PENTAIR THERMAL MANAGEMENT
Formerly. TYCO Thermal Controls
Mineral Insulated Cable (MI Cable)
Fire Rated Cables
www.us.thermal.pentair.com

Fire Resistive Electrical Cables & Components System 1850 MI Cable, UL LISTED for 2-Hour rating for Critical and Essential Circuit Protection. Fire Pump and Service Entrance System 1850SE CI Electrical Circuit Protective System as referred to in Articles 695 and 700 of NEC applications. (Pyrotenax®)

PQI – POWER QUALITY INTERNATIONAL
Harmonic Mitigating & Energy Efficient Transformers
www.powerqualityinternational.com

Power Quality International is uniquely qualified to assist facility owners, managers, and engineering professionals with optimising their power systems to improve efficiency and reduce power system related failures. We've been providing these engineered solutions for more than 40 years.

RUFFNECK HEATERS
Explosion Proof Heaters / UL Listed
www.ruffneck.com

UL Listed Explosion Proof Heaters, Class I, Div. 1 & 2, Class II, Div. 2; Explosion Proof Electric Air Heaters, Explosion Proof Heat Exchanger Units - Steam or Fluids, Explosion Proof Thermostats

SCOTT ENGINEERING
High Voltage Pad Mounted Equipment
www.scott-eng.com

High Voltage Padmounted Equipment Padmounted Loadbreak Switchgear, Padmounted Fuse Gear, Padmounted Switch & Fuse Gear, Padmounted Capacitor Banks, Substation Capacitor Banks, Pole-Line Capacitor Banks, Specialty Cabinets, Pole Line Hardware.

SPRING CITY ELECTRICAL MFG.
Cast Junction Boxes
www.springcity.com

Cast Iron and Aluminum Junction Boxes; Expansion Fittings, and Pull Boxes

STACO ENERGY PRODUCTS CO.
Power Quality and Voltage Control
www.stacoenergy.com/

Reactive Power & Harmonic Compensation Voltage Ratings from 240 to 600 VAC, MV Fixed or Automatically Switched Systems, Harmonic Filtering for Optimum Power Quality, Small Footprint with Maximum KVAR, Standard Off-The-Shelf Units and Specification Designed. Sizes from 50 to 2,400 KVAR, with up to 800 KVAR in Individual Units.

TOSHIBA CORPORATION
UPS Systems & Surge Protection
www.toshibaups.com

Uninterruptible Power Systems Single Phase and Three Phase. 1 – 22 KVA Single Phase On-Line UPS 1 – 3 KVA Single Phase Rack Mount On-Line UPS 15 KVA – 1000 KVA Three Phase On-Line UPS

TRYPSTAR Cable & Power Solutions
www.trypstar.com

Generator Docking Stations for Safe and Easy Connection for Generator Power - Up to 4000 Amps. Alum or Stainless Steel Rotary Generator Docking Stations. Service Entrance Rated Docking Stations. Dual & Single Kirk-Key Generator Docking Stations Portable Power Cable and Connection Devices Load Bank Connections

VISICOMM INDUSTRIES
Solid State & Rotary Frequency Converters
50/60 Hz to 400 Hz
50 Hz to 60 Hz or 60 Hz to 50 Hz
www.50hz.com

Motor-Generator Set Frequency Converters Units 6 to 2000 KVA with Outputs of 400Hz, 60 Hz, or 50 Hz Solid State Single Phase – 1 KVA to 20 KVA Solid State Three Phase – 10 KVA to 320 KVA
